

Commercial real estate, tokenized.

THE BUSINESS

Vesta (Nexus Capital) is a commercial real estate tokenization platform that opens institutional-grade CRE deals to accredited investors through fractional, blockchain-recorded ownership. Offerings are structured under SEC Regulation D Rule 506(c), with a finalized private placement memorandum and Form D filing prepared by securities counsel.

WHY IT WINS

Fractional CRE access

Accredited investors participate in commercial deals at check sizes traditional syndications can't offer.

Compliance-first structure

Reg D 506(c) offerings with counsel-reviewed PPM, Form D filings, and accredited-investor verification built in.

Transparent token ownership

Each investor position is recorded on-chain — clean cap tables, clear records, simpler transfers.

AT A GLANCE

STRUCTURE

SEC Reg D 506(c) private offerings
