

CORE SERVICES

Steadyhand AI Consulting

Configurable AI tools that work for ANY business. Build in 2-3 weeks, deploy immediately.

1

Document Intelligence Engine

Upload any document (contracts, proposals, reports, PDFs, emails) → Claude extracts key info, risks, action items, summaries.

Works for: Lawyers, consultants, real estate agents, recruiters, nonprofits, investors, contractors, agencies

What changes: The context (what documents matter to your business)

Examples:

- Lawyer: Contract upload → obligations, risks, clauses
- Real Estate: Property listing → comps, pricing strategy, risks
- Recruiter: Resume → fit score, red flags, interview questions
- Consultant: Proposal → scope, timeline, pricing extraction
- Investor: Deal doc → valuation, risks, investment angle

80% faster document review | Never miss critical info | Automated action items

2

Data Pattern Analyzer

Feed any data (sales, customers, operations, feedback) → Claude finds trends, anomalies, opportunities, recommendations.

Works for: Every business (sales teams, restaurant owners, real estate, gyms, consultants, agencies)

What changes: The data source (CRM, spreadsheet, survey, operational logs)

Examples:

- Sales team: CRM data → at-risk deals, win/loss patterns, next steps
- Restaurant: Transaction data → high-margin dishes, pricing opportunities
- Gym: Member data → churn risk, engagement trends, retention opportunities
- Real estate: Portfolio → underperforming properties, cash flow gaps
- Agency: Project data → profitability by client, scope creep patterns

Spot opportunities nobody else sees | Data-driven decisions | 15-25% margin/efficiency gains

3

Communication & Content Accelerator

Brief Claude on your message/goal → generates professional copy (emails, proposals, marketing, presentations, social).

Works for: Any business needing to communicate (sales, marketing, support, leadership)

What changes: The tone and format (proposal vs. email vs. social vs. cold outreach)

Examples:

- Sales: "We demoed for a prospect worried about cost" → personalized follow-up email
- Restaurant: "New menu item launch" → social copy, email to members, signage
- Consultant: "Project kickoff" → client email, internal kickoff deck, status update template
- Real estate: "New listing" → description, email to buyers, open house promo
- Recruiter: "Top candidate we want" → personalized offer letter, rejection letters

5-10x faster content creation | Professional tone every time | Consistent messaging

4

Process Optimization Auditor

Describe your current workflow → Claude identifies bottlenecks, inefficiencies, automation opportunities, and suggests improvements.

Works for: Any business with repetitive workflows (proposals, hiring, billing, scheduling, approvals, reporting)

What changes: The specific process you're optimizing

Examples:

- Consultant: Proposal → approval → invoicing (10 days) → Claude identifies 5-day speedups
- Restaurant: Order → kitchen → delivery → spots 30% time waste
- Real estate: Lead → showing → offer → closing (90 days) → Claude finds 20-day optimizations
- Gym: Onboarding → assessment → program → tracking → Claude suggests automation
- Recruiter: Job post → screening → interview → offer (4 weeks) → Claude finds 2-week gains

20-40% faster workflows | Eliminate manual steps | Data-driven process improvements

5

Feedback & Sentiment Analyzer

Customer reviews, survey responses, NPS feedback, support tickets → Claude extracts sentiment, themes, improvement roadmap.

Works for: Every business (anyone with customers, reviews, or feedback)

What changes: The feedback source (Google reviews, Trustpilot, surveys, support tickets, emails)

Examples:

- Restaurant: 200 Google reviews → themes (slow service, great pizza, dirty bathroom) + fixes
- E-commerce: 500 product reviews → what people love, what breaks, what's missing
- Agency: Client feedback → satisfaction trends, at-risk accounts, what to double down on
- SaaS: Support tickets → most common issues, feature requests, frustration points
- Fitness studio: Member surveys → retention risks, preferred classes, facility gaps

Never miss customer insight | Proactive problem-solving | +20-30% retention from action

6

Decision Support Assistant

Present a business decision + relevant data → Claude weighs options, surfaces risks, recommends path forward.

Works for: Any business making decisions (hiring, pricing, expansion, partnerships, product, strategy)

What changes: The decision type (hire vs. outsource, buy vs. build, expand vs. stay, pricing strategy)

Examples:

- Founder: "Hire a salesperson or use an agency?" → Claude weighs pros/cons, ROI, risks
- Restaurant: "Expand menu from 30 to 50 items?" → Claude flags operational impact, margin analysis
- Real estate: "Buy or pass on this property?" → Claude pulls together valuation, market analysis, risk
- Consultant: "Take on this unprofitable client?" → Claude shows profitability, opportunity cost
- Gym: "Launch 6am classes?" → Claude analyzes demand signals, retention impact, staffing needs

Better decisions faster | Risk assessment built-in | Reduced decision paralysis

7

Meeting Intelligence System

Paste meeting transcript or notes → Claude extracts decisions made, action items, owners, deadlines, follow-ups needed.

Works for: Any business with meetings (sales, leadership, client, team, project reviews)

What changes: The meeting context (sales call vs. board meeting vs. project review)

Examples:

- Sales call: 30-min demo recap → next steps, objections, close date extracted automatically
- Board meeting: 2-hour discussion → decisions made, action items, who owns what
- Client meeting: Consultant project review → scope changes, timeline impacts, approval items
- Leadership: Strategy discussion → initiatives decided, metrics to track, dependencies
- Project review: Status check → blockers, on-track items, next week's priorities

Zero missed action items | Clear accountability | Automatic meeting follow-ups

8

Competitive Intelligence Tracker

Feed competitor info (websites, pricing, launches, announcements) → Claude tracks changes, flags opportunities, suggests responses.

Works for: Businesses in competitive markets (SaaS, e-commerce, real estate, fitness, consulting)

What changes: Who you're tracking and what matters to your business

Examples:

- SaaS: Competitor launches feature → Claude flags threat, suggests response
- E-commerce: 3 competitors lower prices → Claude analyzes impact, pricing strategy
- Real estate agent: Competitor agent in your area → Claude tracks their listings, pricing trends
- Gym: New fitness studio opens nearby → Claude suggests retention moves, unique positioning
- Consultant: Competitor lowers rates → Claude analyzes impact on your positioning

Stay ahead of market shifts | Faster competitive responses | Pricing intelligence

9

Knowledge Base Builder

Feed your docs, processes, best practices, customer data → Claude builds searchable knowledge system anyone can query.

Works for: Any business wanting to scale knowledge (onboarding, support, sales, operations)

What changes: Your unique docs/processes (your procedures are what matter)

Examples:

- Agency: 50 project case studies → searchable "what worked before" for similar projects
- Consultant: 100 past proposals → search by industry/solution to accelerate new proposals
- Support team: 500 customer issues + fixes → searchable troubleshooting without email hunting
- Sales team: 10 years of deals + what closed → searchable playbook by deal type/industry
- Restaurant chain: All location best practices → new manager can query "how do we handle rushes?"

Onboarding 50% faster | Consistency across team | Capture tribal knowledge

10

Financial Forecasting & Analytics

Plug in historical financial data → Claude forecasts revenue, margins, cash flow, flags risks, suggests levers.

Works for: Any business managing finances (profitability, growth, cash, pricing)

What changes: Your specific business model (unit economics vary)

Examples:

- Startup: Last 12 months revenue → forecast next 24 months, flag runway risks
- Restaurant: 2 years transaction data → predict seasonal dips, suggest pricing/menu changes
- Consultant: Project profitability history → forecast Q4 revenue, identify at-risk clients
- E-commerce: SKU-level data → forecast inventory needs, flag slow movers
- SaaS: Churn, CAC, LTV history → forecast growth rate, pricing optimization

Cash flow visibility | Confident forecasts | Pricing/strategy optimization

11

Compliance & Risk Checker ⚠️

Describe your situation → Claude generates checklists, flags compliance risks, suggests safeguards.

Works for: Any regulated business (contractors, healthcare, nonprofits, financial, real estate, restaurants)

What changes: Your specific jurisdiction/industry regulations

Examples:

- Contractor: New project type → safety checklist, permits needed, insurance requirements
- Nonprofit: Grant application → compliance checklist, reporting obligations, restrictions
- Restaurant: Expansion to new state → food safety regs, labor laws, licensing needed
- Real estate: New market → disclosure requirements, licensing, contract language
- Consultant: International client → tax implications, contract considerations, compliance gaps

Zero compliance surprises | Regulatory confidence | Reduced legal risk

12

Workflow Automation Designer 🤖

Describe your repetitive task → Claude suggests automation, integrations, or templates

to eliminate manual work.

Works for: Any business with repetitive workflows (invoicing, reporting, onboarding, follow-ups, approvals)

What changes: Your specific tools (Slack, email, CRM, spreadsheets)

Examples:

- Sales: "I manually update CRM after every call" → Claude suggests Slack capture or email integration
- Support: "We respond to 50 similar support tickets daily" → Claude generates response templates + automation
- Finance: "Monthly reporting is 10 hours of copy-paste" → Claude designs automated report generation
- HR: "Onboarding checklist sent via email every time" → Claude suggests automated task system
- Marketing: "We post the same content to 5 platforms" → Claude designs multi-platform automation

10+ hours saved weekly | Fewer errors | Team can focus on strategy

How It Works

1

Pick your tool — whatever hurts the most

2

30-minute call — we scope it together

3

2-3 weeks — we build it

4

We train your team — you own
everything
